Re: Review of *American Sevens*, *American Sevens with a Light Wheel* and *American Sevens with Standard Amusement Wheel* electronic amusement games submitted by Double D Gaming, Inc.

Dear Ms. Halvorsen:

By authorization of LGC# 06-046, **Nick Farley & Associates, Inc.** has reviewed three versions of software for use with the *American Sevens*-themed electronic amusement game submitted by Double D Gaming, Inc. These three *American Sevens* game theme versions are identified as follows:

American Sevens
American Sevens with Light Wheel
American Sevens with Standard Amusement Wheel

These games were reviewed at our laboratory facilities in Bedford, Ohio. This review was performed to determine compliance with the statutes and regulations governing Amusement Games established by the New Jersey Legalized Games of Chance Control Commission.

Game Play

All three versions of *American Sevens* are a three reel electronic skill stop slot machine. To initiate game play a player inserts up to three tokens. After a wager is staked, game play begins by pressing the *SPIN* button at which point the three reels begin to spin. Shortly after the *SPIN* button is activated the three *STOP* buttons illuminate. Once the *STOP* buttons are illuminated, the player must activate at least one of these buttons to stop the spinning reels

within a predefined length of time. If the player does not activate at least one of the three STOP buttons on the game terminal within the predefined length of time, the game will be "VOID" and the amount wagered will be returned to the credit meter available for wager on another game. The STOP buttons on the game terminal are labeled "*STOP REEL 1*", "*STOP REEL 2*", and "*STOP REEL 3*". If the player is successful in stopping the reels on a winning combination of symbols, the player will receive an award based upon the game outcome. All awards are dispensed as tokens, which may be accumulated and redeemed for a prize.

If the "*Light Wheel*" or "*Standard Amusement Wheel*" version is installed, and the player is successful in stopping the reels on a winning combination consisting of a "Spin" symbol, game play enters a "Bonus" round. During the "Bonus" round, the player activates the *SPIN* button, setting the "Light Wheel" or "Amusement Wheel" into motion. Lights on the "Light Wheel" illuminate sequentially around the circumference of the Light Wheel, and come to rest on the bonus prize value awarded to the player. Likewise, if the "Amusement Wheel" version is installed, the "Amusement Wheel" begins to rotate and comes to rest with the bonus prize value to be awarded to the player displayed at the top of the wheel.

Circuit Board and Software Identification

Operation of each of the *American Sevens* game theme version is controlled by software stored on EPROMs housed on the main Central Processing Unit (CPU) board. There is also a sound board that is connected to the main CPU board. These boards are identified as follows:

Purpose	Identification
Main CPU	© Bally Gaming Inc. AS 3356-201 Rev. E
Sound Board	SSB2000

The EPROMs containing the software which controls the operation of each of the *American Sevens* game theme versions are identified as follows:

American Sevens

Software ID	Memory Size	Board Position	Checksum	Kobetron GI-3000 Signature
Amer 7's no wheel 4/27/06 U12	27C512	U12	00C9A8FD	U7HC
Amer 7's no wheel 4/27/06 U15	27C512	U15	00BF3B2D	A70C

American Sevens with Light Wheel

Software ID	Memory Size	Board Position	Checksum	Kobetron GI-3000 Signature
Amer 7's lite wheel 4/27/06 U12	27C512	U12	00C85BAE	60PA
Amer 7's lite wheel 4/27/06 U15	27C512	U15	00BE3B29	6UU0

American Sevens with Standard Amusement Wheel

Software ID	Memory Size	Board Position	Checksum	Kobetron GI-3000 Signature
Amer 7's wheel 4/27/06 U12	27C512	U12	00C8A77C	3CHP
Amer 7's wheel 4/27/06 U15	27C512	U15	00BE2463	76C5

Features And Options

By accessing the operator menu, the operator is availed to three administrative features. The operator menu is accessed by activating the key switch on the cabinet exterior. Once accessed, the administrative features are manipulated through the exterior buttons on the game terminal.

The first feature offered in the operator menu allows the operator to view award payouts. The operator may select the reel position, and the seven-segment display will show the prize to be awarded for the game outcome.

The second feature offered in the operator menu allows the operator to test the token-dispensing hopper. With the cabinet door in the open position, the token-dispensing hopper will dispense 10 tokens.

The third feature offered in the operator menu allows the operator to view the soft meters of the game terminal.

Findings and Conclusion

Nick Farley & Associates, Inc. has reviewed all three versions of the *American Sevens* electronic redemption game, including game operation, hardware, and program source code. Based upon our review, we have found that all three game theme versions of the *American Sevens* device to be in compliance with the Statutes and Regulations governing Amusement Games established by the New Jersey Legalized Games of Chance Control Commission. Based upon our findings, we hereby recommend approval of all three game theme versions of the *American Sevens* device for use in the State of New Jersey.

PLEASE NOTE: *Nick Farley & Associates, Inc.* has not participated in the research and/or development of this device. We have tested and evaluated the previously described game, and have determined that this device has passed the testing criteria designed for the Statutes and Regulations governing Amusement Games established by the New Jersey Legalized Games of Chance Control Commission. This letter is not final approval for use in the New Jersey redemption game market. Final approval must be granted by the New Jersey Legalized Games of Chance Control Commission.

Should you have any questions or require additional information, please feel free to contact our office.

Sincerely,

Nick Farley
President
